

SQL Server 2022 – installation

1. SQL Server – Express edition

Google: SQL Server download

<https://www.microsoft.com/en-us/sql-server/sql-server-downloads>

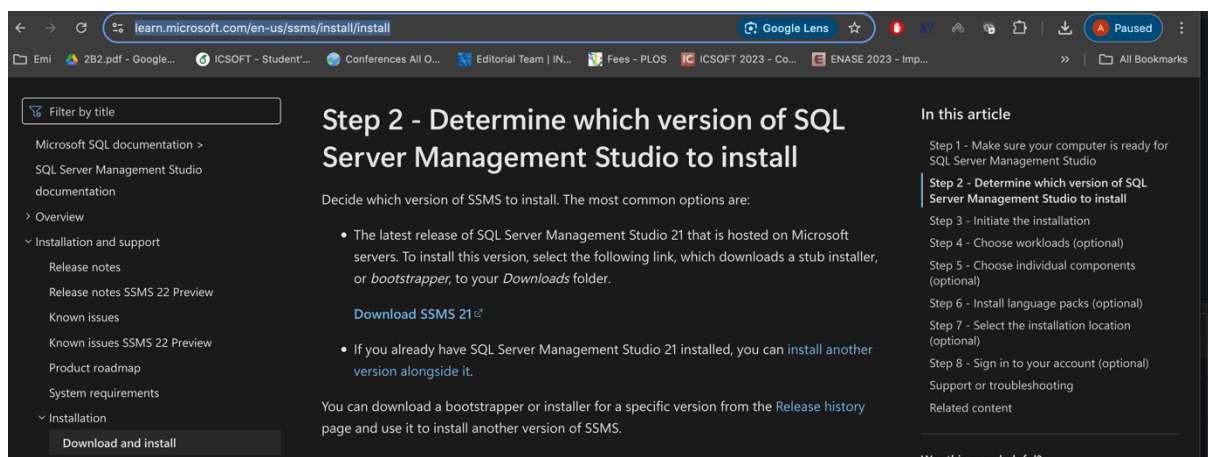

Choose **SQL Server 2022 Express** – download – install (**Basic** installation type, accept terms).

When it is finished, a button **Install SSMS** should be display. Press on it, to install the interface (SSMS), where we will work. This interface will be connected to the **SQL Server** installed.

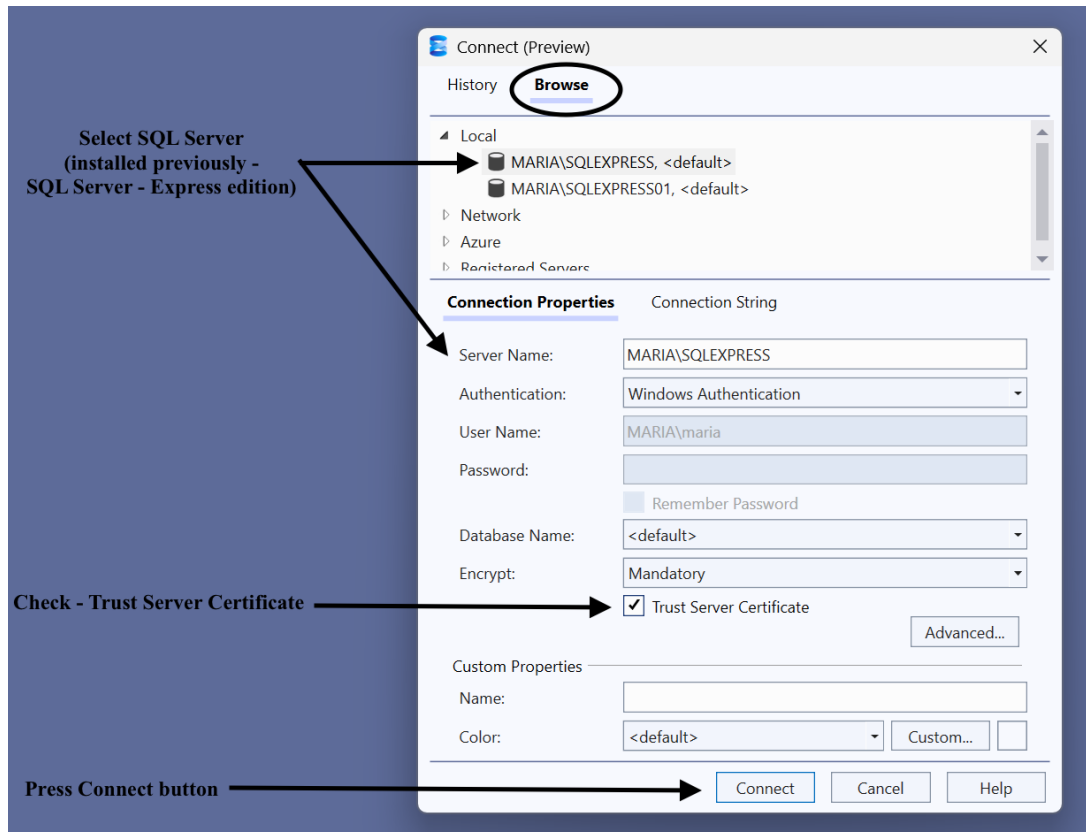

2. SSMS (SQL Server Management Studio)

Google: SSMS download

<https://learn.microsoft.com/en-us/ssms/install/install>

Install, by following the steps indicated in the installation.
When it will done, just start **SSMS** and set the configuration:

Now, the work can start. 😊

Choose **New Query** – to write scripts (create tables, queries, ...).
Press **Execute** to run the **.sql** file.
Don't forget to **Save** the **.sql** file, in your folder projects.

For **MAC** – choose **SQL Server on Azure** (previously, it is required **Docker**); or install a **Virtual Box**, that works like *Windows*.

Another option can be **DataGrip**.
Google: DataGrip sql download
